DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,764,763 (hereinafter referred as "Jensen") in view of US Patent 5,613,004 (hereinafter referred as "Cooperman").

Regarding claims 1-3, Jensen discloses in a cellular telephone including a microphone, a modulator, an antenna, and an RF amplifier, the device serving to receive audio and transmit an RF signal conveying audio modulation (see Figs. 1-3, 16, 17, col. 31, lines 59-67, col. 32, lines 1-5, and col. 33, col. 13-29);

Jensen does not disclose a steganographic encoder for hiding plural bits of auxiliary data within the audio modulation of said RF signal. However, Cooperman discloses a steganographic encoder for hiding plural bits of auxiliary data within the audio modulation of said RF signal (see abstract, col. 1, lines 48-57, col. 4, lines 8-27). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the steganographic encoder teaching by Cooperman with Jensen. The motivation for doing so would have been to provide a disincentive to piracy of material read on abstract. Therefore, it would have been obvious to combine Cooperman and Jensen to obtain the invention as specified in the claims 1-3.

Application/Control Number: 09/924,281

Art Unit: 2616

Regarding claims 4-7, Jensen discloses a method of operating a cellular telephone, said telephone including a microphone coupled to a transmitter, and a receiver coupled to a transducer, the telephone serving to transmit a wireless signal modulated with a voice signal using an antenna (see Figs. 1-3, 16, 17, col. 31, lines 59-67, col. 32, lines 1-5, and col. 33, col. 13-29);

Jensen does not disclose altering the voice signal to steganographically embed a multi-symbol auxiliary data string therein, wherein transmission of the wireless voice signal also conveys the auxiliary data string hidden therein. However, Cooperman discloses steganographically embed a multi-symbol auxiliary data string and conveys the auxiliary data string hidden (see abstract, col. 1, lines 48-57, col. 4, lines 8-27). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine steganographically embed a multi-symbol auxiliary data string and conveys the auxiliary data string hidden teaching by Cooperman with Jensen. The motivation for doing so would have been to provide a disincentive to piracy of material read on abstract. Therefore, it would have been obvious to combine Cooperman and Jensen to obtain the invention as specified in the claims 4-7.

Allowable Subject Matter

3. Claims 8-13 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/924,281

Art Unit: 2616

Conclusion

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Phirin Sam whose telephone number is (571) 272-3082. The

examiner can normally be reached on a compress schedule, from 8:00-5:30, first Wed off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Wellington Chin can be reached on (571) 272 - 3134. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Respectfully submitted,
